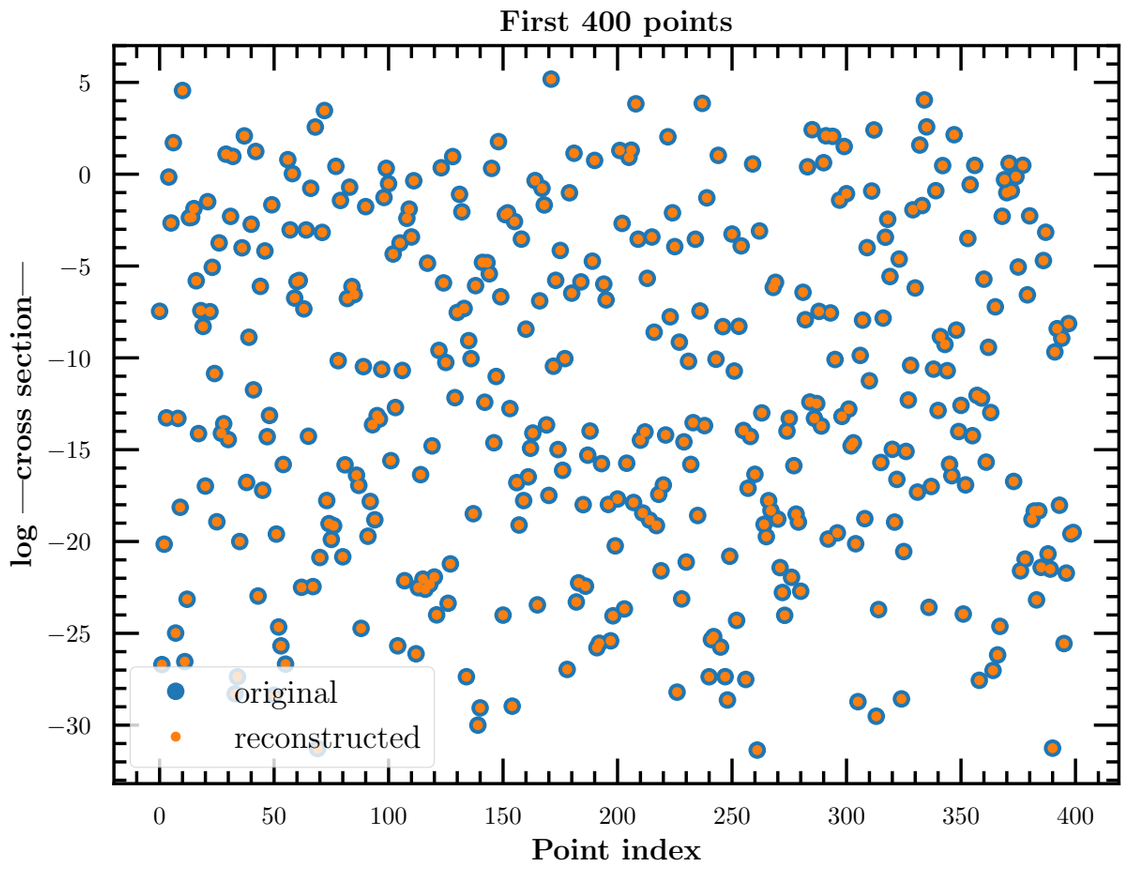
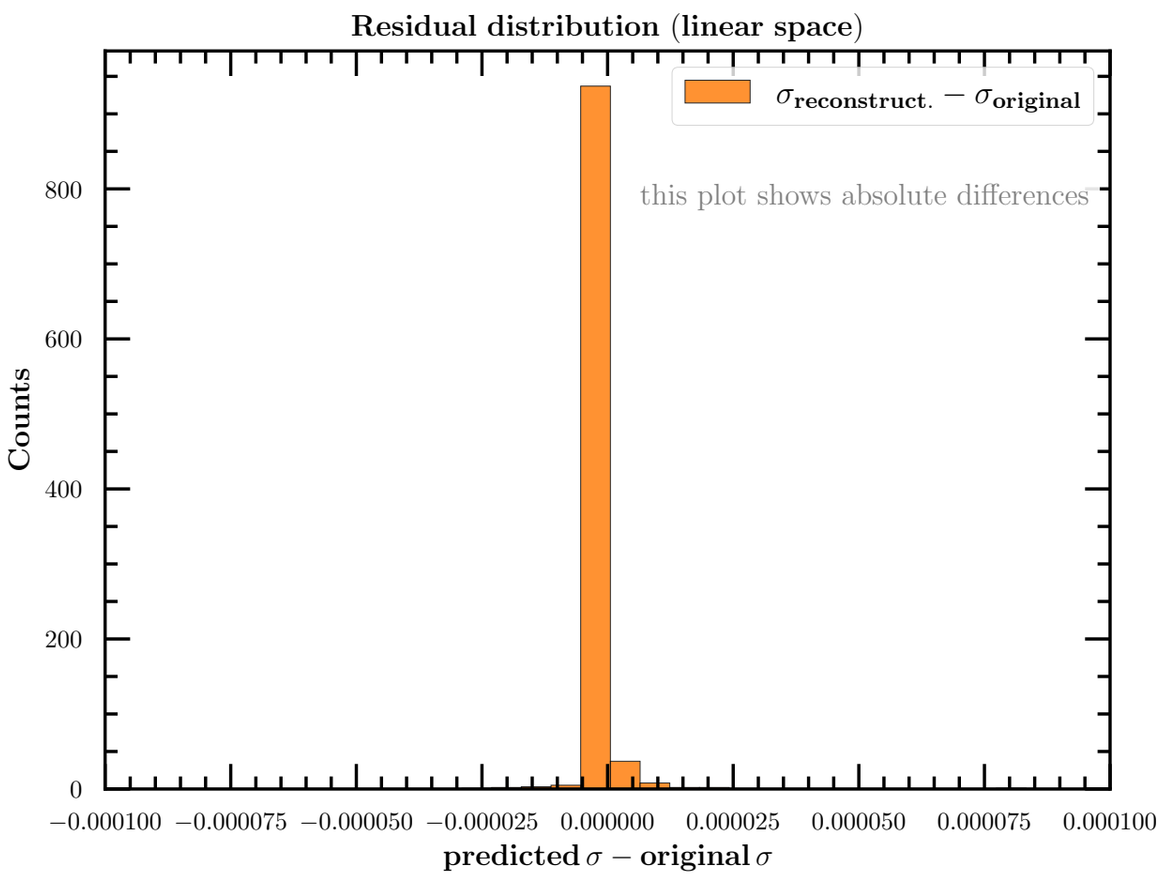
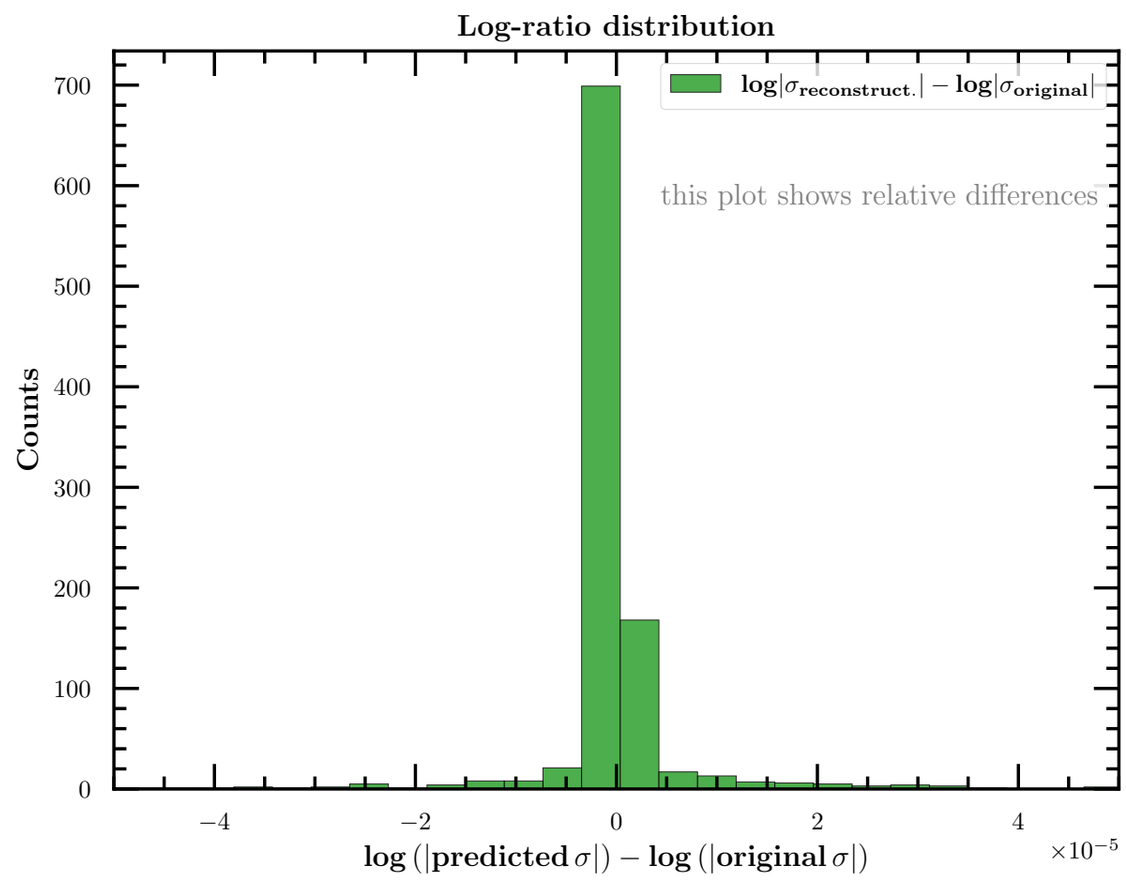
Parity plot (log space)
fit results
Ideal
log (|reconstructed σ|)
log (|original σ|)



First 400 points
original
reconstructed
log —cross section—
Point index



Residual distribution (linear space)
σreconstruct. − σoriginal
this plot shows absolute differences
Counts
predicted σ − original σ



Log-ratio distribution
log|σreconstruct.| − log|σoriginal|
this plot shows relative differences
Counts
log (|predicted σ|) − log (|original σ|)
×10−5
